CARBON LODGE NO. 195, B.P.O.E. ELECTS OFFICERS

At the regular meeting of the Carbon Elks Lodge, held on Thursday evening last, the following officers were elected for the year 1930.
Exalted Ruler, Roy Wacker
Leading Knight, A. H. Jealous
Loyal Knight, G. G. Peters
Lecturing Knight, R. S. Shaw
Secretary, H. C. Willson
Treasurer, J. J. Greenan
Inner Guard, Stan Carney
Tyler Lawrence Poxon
Trustees, C. H. Nash
G. W. Malton and John Leiske.

The appointment of officers of Esquire, Chaplain and Historian, has not yet been made.

MR. AND MRS. J. E. JAMES CELEBRATE SILVER WEDDING

On Friday night last Mr. and Mrs. J. E. James of Carbon entertained a number of friends at their home in honor of their silver wedding anniversary. The evening was spent in whist and Mrs. T. J. Ramsay won the ladies' prize, while Mr. W. Leitch won the gentlemen's prize. Mrs. L. Poxon won ladies consolation and Mr. James won the gentlemen's consolation. A very enjoyable evening was spent by those present.

HOCKEY BOYS TO HOLD DANCE ON FRIDAY, JANUARY 31ST

At a meeting of the Carbon Hockey Club held recently, it was decided to hold a dance in the Elk's hall on Friday, January 31st. The hall was generously donated to the hockey club on this occasion and with other donations being made towards this dance the club hope to have a surplus to cover their initial expense in getting the lighting and other necessary equipment. It is to be hoped that a good crowd will be present on this occasion. The hockey club are in need of the funds and this is their only opportunity of raising money.

The Merry Melody Boys orchestra will furnish the music, with the assistance of Miss Peggy Adams of Drumheller and owing to the hard times the admission charge will only be \$1.00 per couple, extra lady, 25c.

The Carbon bonspiel will be held this year on Tuesday, Wednesday and Thursday, February 4, 5 and 6. It is expected that a number of outside rinks will enter the bonspiel this year.

LITTLE ITEMS OF LOCAL INTEREST

Mrs. J. A. MacDonald and family are in quarantine for Scarlet Fever. Jimmie has contracted the disease.

Mrs. L. G. McQuade left for Calgary last Thursday.

Don't fail to look over the Financial Statement of the Village of Carbon, which is published in this issue of the Chronicle.

Bill Anderson, of Hughenden, arrived last Saturday and is visiting at his home near Carbon.

S. J. Garrett and F. Poxon motored to Calgary on Monday.

A. F. McKibbin was a Calgary visitor for a couple of days this week.

Two rinks under the skids of A.H. Jealous and A. F. McKibbin went to Swalwell last Friday to again play for the MacDonald Trophy, but they met with defeat at the hands of the Swalwellites.

The Carbon Bus is not running this week. It is undergoing a complete overhaul and it is expected that it will be running in a few days again.

G. F. McGregors rink, composed of himself as skip, Roy Barr, H. Evans and Carl Moorhouse, won the Farmers Exchange cup on Monday night when they defeated Harry Jealous by a score of 14-10. Four tams, donated by the Farmers Exchange, go along with this trophy, and the McGregor rink should have no excuse for cold ears for the rest of the curling season.

VILLAGE NOMINATIONS FEB. 3.

Nomination of a new councillor for the Village of Carbon will take place on Monday, February 3rd. There will only be one vacancy to be filled this year on the Council Board, that of Mayor J. A. MacDonald, and we understand that owing to business reasons Mr. MacDonald has declined to run this year. The other two councillors, Jas. Flaws and S. J. Garrett will hold office for two and one years, respectively, according to the Village act.

As yet we have received no definite report as to any nominations to fill the vacancy on the council board this year.

John Atkinson School Trustee

For School Trustee this year, owing to the dropping out of F. J. Besant, John Atkinson was elected by acclamation.

J. A. MACDONALD DONATES CUP FOR JUNIOR DEBATING TEAMS

A meeting of those interested in the continuance of the Oratorical contests which in the past have been sponsored by the Calgary Herald, was held at the home of G. G. Peters last week. Mr. J. A. MacDonald offered to donate a cup for open challenge by any team of three students in the district. This cup will be for the winners of debate of a subject to be set by the committee. All students up to eighteen years of age are eligible to enter and the team holding the cup will not be required to defend it oftener than once a month. The district comprises the towns of Carbon, Three Hills, Acme, Rockyford and Beiseker, as well as all schools in the district between these towns. The Trustee committee consists of G. G. Peters, D. G. Code and J. M. MacDonald. The Carbon Elks Lodge will sponsor all contests in Carbon and lend their support to the very worthy cause.

WHIST AND BRIDGE DRIVE HAS GOOD ATTENDANCE

A very successful Bridge and Whist Drive was held by the Women's Auxiliary of the Anglican Church, Carbon, in the Farmers' Exchange hall on Monday evening, January 20th. The following were the prize winners.

WHIST—Ladies' First, Mrs. Watkins. Men's First, Mr. S. Lilja. Ladies' consolation, Mrs. H. Braden. Mens consolation, Mr. S. Moran.

BRIDGE—Ladies' first, Mrs. T. J. Ramsay. Men's first Mr. Len Poxon. Ladies' consolation, Mrs. G. Peters. Mens' consolation, Mr. Leslie Mancel.

After the drive, supper was served by the committee of the W. A. and Mrs. Evans and Mrs. Torrance rendered songs, which were very much enjoyed by all.—Contributed.

REV. McNICHOL TO PREACH CURLERS' SERMON SUNDAY

Next Sunday evening, January 25th, the Rev. Wm. McNichol, Chaplain of the Carbon Curling Club, will preach a curlers' sermon in the United church Carbon, and all curlers are asked to be present on this occasion. Mr. McNichol's subject will be "The roaring game, or the game of Life." This is the first time that Mr. McNichol will have preached a curler's sermon, although he has curled for forty years, and we trust that on this occasion Mr. McNichol's efforts will be well repaid with a large congregation on this occasion.

Immigration and Unemployment

At the present time much is being said and written on the twin subjects of immigration and unemployment. Hardly an issue of a daily paper appears that does not contain some reference to the problems involved, hundreds of letters to editors are penned expressing one view or another, conferences and conventions pass resolutions, and Governments, Federal, Provincial and Municipal are struggling with the difficulties confronting them. There is in all quarters a tendency manifested to shelve the responsibility on to the other fellow, to, in the descriptive language of the day, "pass the buck," and "let George do it."

With recent weeks headlines in the press have informed a reading public that "3,000,000 are unemployed in the United States," that in Germany "2,000,000 are out of work," that the number of unemployed in Great Britain "remains between 1,500,000 and 2,000,000," while, coming nearer home, that "the unemployed situation is acute in all large Canadian centres of population."

What is the cause? What is the solution? The United States has been experiencing a period of unexampled industrial growth and activity. In 1929 Canada enjoyed the most prosperous year in its history, with all records for manufacturing, building construction, and development of natural resources reaching new high marks. Despite depression in certain basic industries, Great Britain reports more people at work than before the war, while Germany, we are told, is "coming back," and regaining much of her former strength in the export markets of the world.

In Canada the opinion prevails in many quarters that our unemployment problem is largely due to an influx of immigrants, but such a cause cannot be advanced in the case of Great Britain, Germany, or even in the United States, with its rigidly restricted immigration quotas. Yet unemployment seems to be almost universal; in fact there is less in proportion to population in Canada than in other countries. So, the cause lies deeper than in immigration, although, of course, it undoubtedly has some effect.

In the United States it is not partly accounted for by the fact that for some years past mass production has been maintained on a scale hitherto unknown, and the marketing of this enormous production has only been possible through the sale of every conceivable kind of article on the installment plan, until the average income of the buying public was tied up in advance for long periods. Possibly the saturation point has been reached, and, people being unable to buy more, even on a credit basis, production had to slow up.

Is it not also true that the enormous sums now invested in automobiles, radios, and other expensive but, in the case of the average citizen, unproductive devices, being thus withdrawn from productive enterprises is having its effect on other industries?

Again, through the inventive genius of this age, labor-saving machinery and appliances of all kinds have had the result of enabling one man or woman to do the work of two, three or more, with a consequent lessening of the ratio of employment to volume of output. Wages to those employed are higher, but the number of workers actually required in many industries is less, although their output is greater. Here in Western Canada we have an example of this in the big drop in the number of farm helpers required through the introduction of the combined harvester-thresher and the increasing use of motor trucks over horse drawn vehicles. As one result, too, the tendency is again in the direction of larger farms, whereas not many years ago the belief was fairly general that the day of smaller farm holdings providing for more families on the land was approaching.

What governments, economists, manufacturers, labor unions, and our whole citizenship must realize is that a present paradox of unemployment in an era of general expansion and growth is the result of changing world conditions. All countries are affected. Everything is in a state of flux. And because all countries are affected, and also because far away fields always look green, people everywhere are looking elsewhere to better their condition. The inevitable result is that all countries will more and more restrict immigration as a measure of their own national salvation:

What will happen then? There is only one answer: People will have to adjust themselves to changed, and still rapidly changing conditions. They will have to work out their salvation at home. The problem is a huge and difficult one. Nobody yet has the solution. All must think and study, and that is the sole reason for this article—to encourage real study of the problem, instead of the present prevailing tendency to lay the blame on somebody else.

Says Insanity Increasing

Eminent Psychologist Makes Some-
what Startling Assertion

After copious consideration and profound contemplation an eminent psychologist asserts that it is only a matter of time when we will all be in the asylum. He finds that insanity is increasing rapidly, that a few centur-

ies hence practically the whole world will be daffy in the bean. In a universe of nuts a squirrel may be king.

The fact that the world is going crazy is no surprise to some folks. They think that it is that way already. But on the other hand there are some of good repute who are still able to figure out that this is not such a rotten world after all, and that there is enough skill and intelligence available to keep the machinery running for an indefinite period.—Los Angeles Times.

Unemployment Relief

Regina City Council Projecting Civic
Works During Winter Season

At an actual cost of \$20,000, another sewer programme is now being considered by Regina City officials as an unemployment relief measure, and will supplant the programme already undertaken and nearly completed.

To date this winter, eight and a half blocks of sewers have been dug by day labor in various sections of the city as unemployed relief. As well, a plank walk programme of 18 blocks has recently been started for unemployment relief at a cost of \$5,000.

DO YOU SUFFER WITH HEADACHE?

So easy to get quick relief and prevent an attack in the future. Avoid bromides and dope. They relieve quickly but affect the heart and are very dangerous. They are depressing and only give temporary relief, the cause of the headache still remains within.

The sane and harmless way. First correct the cause, sweeten the sour and acid stomach, relieve the intestines of the decayed and poisonous food matter, gently stimulate the liver, start the bile flowing and the bowels pass off the waste matter which causes your headache. Try Carter's Little Liver Pills. Druggists 25c red pkgs.

W. N. U. 1821

Good Word For Women Drivers

New York Commissioner Says More
Men Break Traffic Laws

Commissioner of Motor Vehicles, Charles A. Hartnett, states that women drivers in New York State represent 16 per cent. of the total number. In the last four months 27,130 men violated traffic laws—as against 653 women.

On an average day 250 men are arraigned and only four women.

Over this four-month period 3,918 men were up for speeding, as opposed to sixty-six women.

Difficulties over car lights have brought 4,635 men to court, while only sixty-nine women were charged with similar offenses.

Smoking motors were charged against seventeen men, but against not one woman.

One woman was very legibly booked for intoxication. To offset that showing there were 132 men accused of driving while drunk.

Thirty women failed to keep to the right, 4,075 men did likewise.

Seven women mistook a one-way street. There were 481 men who made the same error.

Thirty-two women did not have their licenses at a crucial moment. Similar lapses of memory affected 1,226 males.

INFLUENZA'S VICTIMS

Left Weak, Miserable and a Prey
To Disease In Many Forms

One of the most treacherous diseases afflicting the people of Canada during the winter months is influenza. It almost invariably ends with a complication of troubles. Its victims suffer with alternate fevers and chills, headaches and backaches. It leaves them an easy prey to bronchitis and pneumonia. Indeed, the deadly after effects of influenza may leave the victim chronic invalid. You can avoid influenza entirely by keeping the blood rich and red by the use of Dr. Williams' Pink Pills. If you have not done this and the disease attacks you, you can banish its deadly after effects through the use of this great blood-building nerve-restoring tonic.

Here is proof of the power of Dr. Williams' Pink Pills over this trouble. Mr. F. H. McMullen, Belleville, Ont., says:—"Some years ago, following a severe attack of influenza, I was left in such a weak condition that my friends thought I would not get better. I developed nervous indigestion, and my blood got thin and watery. In this weakened condition I began the use of Dr. Williams' Pink Pills, and these did what other medicine had failed to do—brought me back to health and strength. I can honestly say I think them the best blood builder and nerve tonic known, and I shall always praise them."

You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

To Pay \$20,000,000 In Cash

The growing prosperity of Canada is indicated in the official announcement that the Canadian Government will redeem in cash loan of \$20,000,000 payable on February 1, 1930. The revenue of Canada was greater in the first ten days of the current fiscal year than the total for the whole of the year 1868, the first year of Confederation. The surplus of revenues over expenditures last year would have more than paid off the national debt of Canada as it stood in the early seventies of the last century.

Awful Asthma Attacks. Is there a member of your family who is in the power of this distressing trouble? No service you can render him will equal the bringing to his attention of Dr. J. D. Kellogg's Asthma Remedy. This remarkable remedy rests its reputation upon what it has done for others. It has a truly wonderful record, covering years and years of success in almost every part of this continent, and even beyond the seas.

Real Service

If a shower comes up in the city of Berlin, the pedestrians will find on the next corner an automatic machine for the vending of umbrellas. Drop 15 cents in the slot and walk off with a brand-new storm shelter. The umbrellas are made of oiled paper and may not last a lifetime, but they are good for a dozen or more storms, and are right handy when the drops are dropping.

A pleasant medicine for children is Mother Graves' Worm Exterminator, and it is excellent for driving worms from the system.

When it comes to wheat, says the Toronto Globe, Canada is sure of her ground.

That Sore Throat Needs Minard's.

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude salts. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

To Extend News Service

Movement To Enlarge Newspaper
Service In Western Canada

Newspaper publishers and editors of western Canada, members of the Canadian Press, met at Vancouver recently, in preparation for the great extension of the news service in western Canada following the printerization of the leased wire telegraph circuits now in progress from Winnipeg to Victoria, which will about double the wordage laid down in the individual newspaper offices and will permit scope for much freer interchange of news as between the four western provinces, as well as the publication of more eastern Canadian news in the west and more western Canadian news in the east.

Proposals of the management for the betterment of the news service, both foreign and domestic, were endorsed and in particular the meeting went on record as recommending to the board of directors of the Canadian Press the early establishment at Tokio of a Canadian Press staff representative, now that a Canadian ministry has been established in Japan.

B.C. Lumbering Operations

Four hundred plants are engaged in manufacturing lumber products in British Columbia, involving an investment of 200 million dollars. In 1928, the cut was over three billion feet. These plants employ forty thousand people and pay out in wages sixty million dollars annually.

The strong no less than the weak must bear the penalty of their own natures. The man or woman who has learned to stand alone must not complain if left to stand alone much of the time.

Tribute To Canadian Industry

Canada Has "Cleanest" Tea Ware-
house In The World

On a tour of the Dominion, under the auspices of the British Institute of Certified Grocers, six post graduates visited the Montreal plant of the Salada Tea Company, of Canada, Limited. The following report made by the secretary, Mr. C. L. T. Beeching, appeared in the Tea & Coffee Trade Journal, of New York.

During the tour they (the graduates), inspected some of the wholesale and retail tea concerns in the Dominion, and they considered that the Montreal plant of the Salada Tea Company was the neatest and cleanest tea blending warehouse and packing centre in the world.

Canada has reason to be proud of industries that can make such an impression on visitors of this calibre.

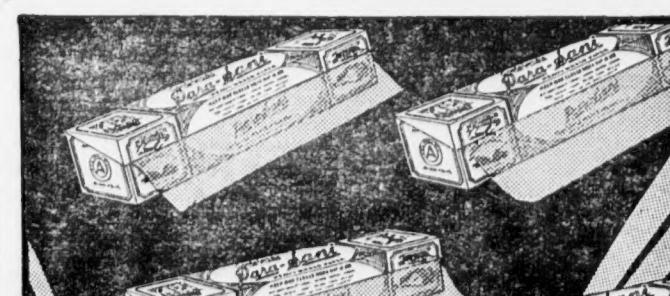

Falling Hair—Just try Minard's.

There are 21 million telephones in the United States which can be connected to seven million in Europe for conversation, using radio telephony across Atlantic.

At one entertainment given by George Washington, the candles to light the banquet hall cost ten dollars an hour.

by noon on Tuesday or no changes
can be made or ads. discontinued.Paper goes to press Wednesday af-
ternoon each week.**EDOUARD J. ROULEAU,**
Editor and Publisher**HOCKEY CLUB MEETING**A meeting of the hockey club was
held at the rink Sunday afternoon and
it was decided to hold a dance in the
Elks hall on Friday, January 31st, and
all arrangements were gone into by
the boys.A team captain, in the person of W.
Hilton was elected on this occasion.
A team manager was also to be elected
and the only nomination for this
position was Stan Carney, he being
elected by acclamation to this position.**C.G.I.T. SLEIGH RIDE**The Apex group of the C.G.I.T. had
a most enjoyable sleighing party on

Friday evening, Jan. 17, to which three
boys took turns at driving. They left
Carbon singing C.G.I.T. songs to the
accompaniment of the chimes of a
cow bell. When about three quarters
of the way out they saw a car lost in
a field of deep snow. They immediately
rescued them and a few girls who
went to the rescue received a ride in
the car to the end of the journey. They
arrived at Mr. and Mrs. Congos and
were received with a hearty welcome.
Everyone enjoyed the evening very
much and after having a lunch, which
consisted of hot dogs and coffee, the
group left for their homeward ride,
which was seven miles—C.G.I.T.

**TENDERS FOR BUILDING TEACH-
ERAGE AT LENNOX SCHOOL**

Sealed Tenders will be accepted by
the undersigned up till noon on Sat-
urday, February 8th, for the building
of the new teacherage at the Lennox
School. Plans and Specifications may
be seen at the office of the Crown
Lumber Company, Carbon and at the
office of the Atlas Lumber Company,
Hesketh.

The lowest or any tender not nec-
essarily accepted.

G. W. APPLEYARD,
Sec.-Treas. Lennox School District,
Carbon, Alberta.

**BETTER BRIDGE RULES
PUBLISHED BY LEGION**

Aimed at a finer game and more
pleasant evenings in the future, the
Legion Rally, official organ of the Can-
adian Legion, has published the fol-
lowing bridge rules, which should be
studied carefully by even the most
adept followers of the ancient card
game:

1. Pick up your cards as dealt. You
will be ready to bid ahead of the others.

2. When you have a poor hand sig-
nal immediately by saying "Who the

heck dealt this mess?"

3. If you get a poor partner, keep
score yourself; you've got to have
some advantage.

4. Lead from your own hand or
dummy, as convenient.

5. Never hurry. Try several cards
on a trick until you are sure which
one you prefer.

6. Occasionally ask what is trump,
for it will show you are interested in
the game.

7. Trump your partner's ace—and
cinch the trick.

8. Walk around the table when you
are dummy and look at the other
hands. Tell them what cards are good
and how many tricks they can take
if they play right.

9. Always ask your partner why he
didn't return your lead; this will re-
mind him to lead it next time.

10. Don't try to remember the rules.

It is too confusing.

11. Always explain your plays, par-
ticularly when set. It shows your card
knowledge.

12. Talk about other subjects during
the game. It makes for good fellowship.

13. Claim all the honors—you might
get away with it.

14. Eat chocolate caramels or other
adhesive candy while playing. It keeps
the cards from skidding.

15. After the third round lay your
hand on the table and claim the rest
of the tricks; you may not have them,
but it's much easier to play with all
the cards on the table.

NOTICE OF VILLAGE MEETING

NOTICE IS HEREBY GIVEN that
a meeting of the electors of the Village
of Carbon will be held at the Elks hall,
Carbon, at seven o'clock p.m., on Mon-

day the third day of February, 1930,
for the discussion of the affairs of the
Village; and that from eight o'clock
p.m. to nine o'clock p.m. on the same
day and at the same place, nomina-
tions for the office of Councillor will
be received. (One councillor to be el-
ected).

ALEX REID,
Secretary-Treasurer

The Village Council have authorized
the Dog Catcher to destroy all dogs
not licensed after January 31st. Dog
owners or harbourers of dogs who
wish to save their pets are asked to
procure a license from the secretary-
Treasurer of the Village immediately.

All persons wishing to continue in
the dray business must have their li-
cense on or before January 31st, 1930,
or quit Draying.

ALEX REID,

WORLD HAPPENINGS BRIEFLY TOLD

The department of national defence has ordered 16 new light aircraft for use in connection with training in the Royal Canadian Air Force, at a cost of \$85,000.

The New Zealand Government has invoked force of arms to enforce its authority over British Samoa, and end the long resistance of Samoan natives to its government.

Immigration to Canada in the first eight months of the current fiscal year—from April 1 to November 30, 1929—totalled 136,440, a decrease of 2,158 when compared with the corresponding period of 1928.

Four crusaders in the cause of greater markets for British Columbia lumber have left for the Antipodes for a four months' sojourn in Australia and New Zealand, studying the requirements of those countries.

Cannibalism is practically unchecked in the famine-swept provinces of China, George Andrews, a missionary from Kansu province, told British and United States missionaries in an address at Shanghai, picturing scenes of almost unbelievable horror and death.

The past year has been one of marked progress for the Alberta Wheat Pool, accord'ing to an official report, which shows an increase in membership during the year of 5,819. Total membership at October 31st, 1929, was 40,915 with 4,625,309 acres under contract.

Heart and Nerves

Caused Her To Have Cold Hands and Feet

Mrs. Joseph Price, Red Pine, N.B., writes:—"Several years ago I was troubled with my heart and nerves and was so bad, at times, my hands and feet would become numb and cold."

"I happened to see

advertised and started taking them at once. I continued for some little time, and since then I have had no return of my trouble."

Price, 50¢ a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Why Dutch Are Sturdy

Start Day With Breakfast Of Many Courses

A Dutch breakfast is like no other meal in the world. There are, to start with, at least seven kinds of bread, plain white bread, ginger bread, plain buns, buns with raisins, brown bread, toasted biscuits, sweet cakes and a kind of fruit cake. You will find at least three or four kinds of meat, could sliced veal, roast beef, ham and sausages.

Then, if you don't see it all at once, you smell the cheese, two or three of the Dutch specialties, including limburger and Edam. There are several dishes piled with boiled eggs, and, of course, there are jams and honey and seasonable fruits. The climax is a pot of steaming coffee, not the insipid beverage of the rest of Europe, but the real thing from the Dutch colonies.

Ask Reduction Of Income Tax

Canadian Chamber Of Commerce Submits Some Important Questions To Federal Cabinet

The views of the Canadian Chamber of Commerce on a number of important national questions were submitted to Prime Minister Mackenzie King and members of the Dominion Cabinet, at Ottawa, recently.

Headed by Col. J. H. Woods, of Calgary, president of the chamber, a deputation waited upon the prime minister and his colleagues and presented a memorandum based on resolutions passed and subjects discussed at the Calgary meeting of the chamber last summer.

Such important matters as the construction of the St. Lawrence waterways; reduction of the income and sales taxes; seasonal unemployment; development of the Peace River country; construction of a national highway; inquiry into complaints of the fruit and vegetable industries; development of Empire trade, etc., were touched upon in the memorandum submitted.

In connection with the suggestion of the deputation for the further reduction of the income and sales taxes as when warranted by the Dominion's finances, and the avoidance of duplicatory taxation," Hon. C. A. Dunning, Minister of Finance, made a few comments. He pointed out that the federal income tax was a war measure, and that the Dominion still required money to pay war obligations.

Suggestions had been made by some of the provinces that the Dominion abandon the income tax. But, said Mr. Dunning, the Dominion could not do without this tax. Another suggestion had been made by certain provinces, however. That was that the field be divided between the Dominion and Provinces. The Dominion, for instance, might retain business income taxation and leave personal income taxation to the provinces. Without making any promises, Mr. Dunning asked the deputation to think over the situation with these suggestions in mind.

Recipes For This Week

(By Betty Barclay)

ORANGE BREAD PUDDING

1 cup bread crumbs.
2 tablespoons butter.
2 cups scalded milk.
2 egg yolks.
1/2 cup sugar.
Juice 2 oranges.
Grated rind 2 oranges.

Soak bread crumbs, butter, and scalded milk thirty minutes; then add egg yolks, beaten with sugar, and orange juice and rind. Pour into a buttered pudding-dish and bake in a moderate oven until firm. Cover with meringue.

GRAPEFRUIT MARMALADE

1 orange.
1 lemon.
1 grapefruit.
Water.
Sugar.

Slice fruit very thinly, rejecting only seeds and core of the grapefruit. Measure fruit, and add to it three times the quantity of water. Let it stand in an earthen dish over night, and, next morning, boil for ten minutes only. Leave until next day, then boil two hours. Measure, add an equal amount of sugar, and boil, stirring occasionally, that it may not burn, about an hour, or until it sheets from spoon. Pour into sterile glasses; let stand covered with cheesecloth, until firm, then cover with melted paraffin.

B.C. Pilchard Industry

Now One Of The Most Important Branches Of Province's Fisheries

Starting with the very small beginning of one plant and a catch of 500 tons in 1925, the pilchard industry of British Columbia has assumed very large proportions and during the present year there were 23 plants in operation handling a total catch of 80,000 tons, making the industry one of the most important branches of B.C. fisheries. The product of the pilchard oil and meal this season is valued at \$1,750,000, most of the oil going to the United States where it is used largely in the soap industry, while the meal is shipped to Germany, Japan and the United States.

Predicts League

Will Encircle World

General Smuts Says All Nations Will Eventually Join

In not more than ten years the whole human race including Russia will be represented at the council table of the League of Nations. This was the prediction of General Jan Christian Smuts, South African statesman, speaking at a dinner in New York, arranged as a part of the celebrations in the U.S. for the tenth anniversary of the founding of the league.

"It would be a very serious and a very tragic thing," said General Smuts, "if when all the nations of the world gather there, the seat of the founder and inspirer should remain vacant."

In this and other references he paid tribute to the late President Wilson as one of the main forces in bringing the league into existence. The United States, he pointed out, was bound to enter into international conferences whether within or without the league. The pact of Paris required. In this way the method of conference for disposing of international disputes would become universal and once this came about peace would be guaranteed without fail.

Always Ready and Reliable.—Practically all pains arising from inflammation can be removed with Dr. Thomas' Electric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is conveyed to the inflamed tissue which is quickly soothed. This fine old remedy is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

One Jump Ahead

Cubist artist: "You see, we moderns strive for the purgation of the superfluous, which throws the accent on the inner urge. Do you follow me?"

Visitor: "No, I'm ahead of you. I came out of the asylum last week!"

Accidents in London streets are responsible for four people killed and 176 injured every day.

WINDOLITE

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 185 to 130 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Wilder Silver Medal

W. T. Macoun, Dominion Horticulturist, Is Rewarded For Good Work Accomplished

The Wilder Silver Medal, one of the highest awards made by the American Pomological Society, has been given to W. T. Macoun, Dominion Horticulturist, for his work in the breeding of new varieties of apples and in the interests of horticulture generally. The award was announced at the meeting of the American Pomological Society, held recently at Roanoke, Virginia.

Miller's Worm Powders not only exterminate intestinal and other worms, but they are a remedy for many other ailments of children. They strengthen the young stomach against biliousness and are tonic in their effects where the child suffers from loss of appetite. In feverish conditions they will be found useful and they will serve to allay pain and griping in the stomach, from which children so often suffer.

Eastern newspapers have revived the controversy over the shortest poem in the English language. Years ago the New York Sun gave the prize to this one, entitled "Fleas."

MINARD'S
"KING OF PAIN"
LINIMENT

The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer, Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

TORONTO, ONT.

TAKES HOPEFUL VIEW OF SUCCESS OF NAVAL PARLEY

London, Eng.—Great Britain can only move on the principle that other nations move correspondingly with her, and that when an agreement on naval disarmament is arrived at, it shall represent an international policy adopted by the other nations as well as Great Britain, this comprised the keynote of the formal remarks made by Prime Minister Ramsay MacDonald, when he met a couple of hundred newspaper correspondents of all countries, both resident in London and specially sent to the British capital, who will report the naval disarmament conference.

Among points the prime minister established, were that Great Britain is looking for the eventual elimination of the battleship, both on account of its tremendous expense (Mr. MacDonald mentioned they cost £7,000,000 apiece), and also because of the differences among naval experts concerning their utility. Until battleships are eliminated it is sought to effect a gradual reduction in their tonnage and gun-power when replacements are made.

British authorities, the prime minister continued, took a hopeful stand on the instruments already effected, such as the Locarno pact, the optional clause of the world court agreement, and the pacts of Washington and Paris with a number of additional regional agreements. These instruments had already given the whole world a greater feeling of security, so that if the risk of war had already been reduced, it was surely reasonable, he said, to expect armaments could be reduced.

Premier MacDonald stressed that if the conference failed, it would mean the world would be faced with 10 or 20 years' competitive naval building. But he was confident it would achieve a treaty effective in reducing navies to the lowest level consistent with national safety.

Today also, Lord Bridgeman, first Lord of the Admiralty, in the former Conservative Government, attacked the Labor Government for lowering the British level of cruisers necessary for Empire defence, from 70 to 50. The justification for this given by the government, the improved atmosphere resulting from the Paris pact, "is most unconvincing," Lord Bridgeman said.

Speaking to the British Naval League, Lord Bridgeman added the belief that some agreement might be reached in a spirit of give-and-take; "but others must give as well as ourselves."

At another meeting, Vice-Admiral E. A. Taylor also expressed grave fears for the future of Britain's naval defences and some doubts as to the security offered by the Kellogg-Briand pact.

"The Kellogg pact is no guarantee whatever that war is a thing of the past," Vice-Admiral Taylor declared.

New German Cruiser

Is Named After Vessel Sunk In Battle On the North Sea

Wilhelmshafen, Germany.—The new German Cruiser "Koeln," 6,000 tons, was ceremoniously commissioned recently, replacing the old cruiser Amazone withdrawn from service. Commander Von Schroeder, in a speech, recalled that the first "Koeln" was sunk in battle in the North Sea, on August 28, 1914, and that only one man was saved after clinging three days to a piece of wreckage. The second "Koeln" was sunk at Scapa Flow.

U.S. Automobile Fatalities

Figures Show 31,500 People In 31 States Killed In Auto Mishaps In 1929

Chicago, Ill.—Figures made public by the National Safety Council showed 31,500 persons were killed in automobile accidents in 31 states during 1929.

The total was 13 per cent. more than in 1928, the report said, while motor vehicle registration increased only 8 per cent.

More than half the victims were pedestrians.

Start Hazardous Trip

Five Men Making Journey Across Rockies On Skis

Jasper.—Five young men have left Jasper, Alberta, on a 300-mile skil trip across the Rocky mountains to Banff. It will be one of the most hazardous adventures of its kind ever undertaken, and if the trip is successful it will be the first time such a crossing has been made during the winter months.

The members of the party are: Vernon and Allen Jeffry, Pete Withers, Frank Burstrum and Joe Weiss, all of Jasper Park, and all experienced mountaineers and skiers. They expect to conclude their trip by February.

The adventure was planned last spring and during the summer adequate caches were placed at strategic points along the route which, in some cases, will be more than 9,000 feet above sea level. At such altitudes very low temperatures, in some cases sixty below zero, are likely to be encountered, and the party will also have to face such dangers as unknown snow conditions and the elimination of trail guides that are visible during the summer.

As far as is known this is the longest continuous ski trip ever attempted anywhere in the world.

Children Die In Fire

Three Smothered By Smoke Before Rescue Could Be Made

Hull, Que.—Fire which broke out while they were playing about their home, took the lives of the three children of Mr. and Mrs. Pierre Parisse here. The theories entertained as to the origin of the fatal blaze are that either the children were playing with matches or an electric heating plate set fire to the walls.

The dead are: Jean Paul, aged five years; Paulette, two years and six months, and Adrienne, seven months.

The conflagration, breaking out during the brief period the mother absented herself to telephone from the ground floor apartment of the triplex in which the Parisse family resided, gave off such a volume of smoke that the little tots were smothered before a rescue could be effected.

Korean Students Strike

Over Ten Thousand Said To Be Involved In Trouble

Seoul, Korea.—One thousand Korean students including 250 girls, have been arrested as a result of a strike of 13 college and high schools, including two missionary institutions run by United States societies.

The strike involved students estimated to number 10,000. It occurred during the post-holidays examinations, and ostensibly out of sympathy for the 900 students arrested last month. The December strike was said to have been due to long standing quarrels between Japanese and Korean students of the middle schools.

Many of those arrested last month still are in prison. Japanese authorities believe the new strike was engineered by a street society with Communistic tendencies.

Launch Big Undertaking

Alberta Livestock Pool Is Going Into the Packing Business

Lethbridge, Alberta.—The Alberta Livestock Pool will go into the packing house business, co-operative leaders announced here recently. It was stated that definite steps were being taken to establish regular plants at Lethbridge, Calgary and Edmonton, the growers to be asked to become shareholders in the enterprise. The campaign in the south, sponsored by the Southern Alberta Co-operative Association, with 2,000 members—the largest co-operative livestock unit in the province—will be launched at once.

Naval Architect Dead

Victoria.—One of the most widely known architects of his day, and who had to his credit the building of three Spanish cruisers that took part in the battle of Santiago, in 1898, and was founder of the steel ship building industry in Japan, is dead here in the person of James Stewart Clark, following a prolonged illness. He was a native of Troon, Ayrshire, Scotland, and was eighty years of age.

COUNTESS OF SEAFIELD

Vessel Adrift On Atlantic

Reward Is Offered For Return Of Schooner To Newfoundland

Halifax.—A reward of \$1,000 is being offered by the government of Newfoundland to any officer of any ship who goes aboard the schooner "Neptune" and brings back to Newfoundland the vessel that is drifting at the mercy of sea and wind somewhere in the North Atlantic. Her captain, accustomed only to shore navigation is unable to bring her to port.

This information, broadcast from Cape Race, was received by C. H. Harvie, local marine and fisheries agent. Hundreds of ships crossing the Atlantic would pick up the message.

The schooner has been drifting helplessly since it left St. John's Nfld., on November 29, and was driven out to sea by a hurricane that scattered the fleet of 10 vessels with which the "Neptune" had left for home ports on the northeast coast of Newfoundland.

The "Neptune," carrying 19 persons, was reported "all right," 720 miles southeast of Newfoundland on December 15.

May Migrate To Mexico

Doukhobors Sending Delegation To Investigate Lay Of Land

Saskatoon.—Doukhobors of Canora district are sending six investigators to Mexico to investigate the lay of the land with view to possible migration on a considerable scale when spring comes.

Decision to send the delegation, which will represent both brotherhood and independent doukhobors, was made at a largely attended meeting in Canora.

Of the delegation which is going to Mexico, two will be from the brotherhood at Verigin, one from British Columbia, and the other three men are Seville Chernoff, of Verigin; Wasyl Novokshonoff, of Buchanan; and W. Popoff, of Blaine Lake. Peter Verigin, well-known Doukhobor leader, whose father met a violent death in 1924, will accompany the delegation as far as New York. Verigin presided at the Canora meeting.

Rust Resistant Wheat

Marquillo Wheat Grown At Saskatchewan University For Some Years

Saskatoon.—Although Marquillo wheat, now recommended by the University of Minnesota, is a production of the plant breeders at that university, it has been grown at the University of Saskatchewan for a number of years, and has proved highly rust resistant and equal to Marquis except for a slight yellowness of flour color.

This wheat has been crossed with the Marquis at the University of Saskatchewan and Dr. J. B. Harrington, in charge of this work, expects to have offspring of this cross which gives great promise of extremely high milling quality along with the rust resistance of the Marquillo parent.

Will Be Guest At Banquet

Ottawa, Ont.—On his return from his tour in Western Canada, Hon. R. B. Bennett, Conservative leader, will be the guest of honor at a banquet in Clinton, Ont., on January 29.

Chinese Railroader

Jun-Ke Choy, special representative of the Ministry of Railways for the Chinese Nationalist Government at Nanking, China, (right), who arrived at Saint John, January 4th, from Great Britain, on board the Canadian Pacific liner "Duchess of Richmond," with Mrs. Choy, (Centre), and P. C. Chen (left.) Mr. Choy is greatly interested in Canadian railroading, and when in Montreal, had conferences with Grant Hall, Vice-President of the Canadian Pacific Railway, and with other officials. Mr. Choy expressed himself as deeply impressed with the Canadian Pacific System.

FARMERS MUST MAINTAIN HIGH WHEAT QUALITY

Saskatoon, Sask.—Unless Canadian farmers maintain the high quality of their wheat, they are in imminent danger of finding no market for it, according to Major H. G. L. Strange, of Fenn, Alberta, who addressed the convention of the Saskatchewan Field Husbandry Association at the University of Saskatchewan. Major Strange, once winner of the grand award of the International Hay and Grain Show, at Chicago, and an enthusiastic seed grower has made a study of the conditions in respect to marketing wheat, not only in Canada but also in England and in continental Europe.

"The man who buys is the important man," stated Major Strange, "and not the producer. If we do not provide a product of quality and at a price which suits the consumer, we will not be able to sell it. Not long ago the cry was raised for two dollar wheat, and we were told that the world could not get along without our grain. During the last six months we have been shown how well the world can and will do without Canadian grain, for the millers of Europe have reduced the percentage of flour from our wheat, which is mixed into their bread, from 35 to 10.

This, stated the speaker, was not because they objected to the higher price altogether, but because the quality in the last few years has been sacrificed for quantity in production. Countries buying Canadian wheat are devoid of sentiment, and Canadians sell their grain to Britain and then buy goods from the United States. The Argentine buys goods with the money received for their grain, and keeps a good customer. Sheer economic necessity compels the British buyers to go where they can get the most value for their money and sell the most goods in return.

Russia is again in the market, and as a result, the price of wheat drops eight cents in Canada. There is no reason for Canadian farmers, with the advantage in methods they have gained in the past five or ten years, not holding the top of the world market with their wheat, if the former high standard is kept up. The only way to do this is to follow the advice of Cato, who, two thousand years ago, said: "Plough well, sow good seed and keep down the weeds." The C.S.G.A. offers facilities for the procuring of good seed equalled by no other organization in the world, and it is up to the farmer to protect his own interests.

Want Old Age Pensions

Immediate Acceptance Of Government Pension Plan Is Urged For Quebec

Quebec, Que.—William Tremblay, Conservative M.L.A. for Maisonneuve, urged the immediate acceptance by the Quebec Government of the Dominion old-age pension provisions, speaking in the legislative assembly, in the course of the debate on the address in reply to the Speech from the Throne. He argued that the people of Quebec were aiding in the payment of pensions in other provinces through the Dominion taxes and getting nothing for their own aged people.

Express Fear For Islanders

London, Eng.—The Daily Express expressed grave fear for the inhabitants of Bardley Island off Carnarvonshire, who have not been reached from the mainland since December 15, due to the gale which has been most persistent since then. They were believed to be without food. There has been no response to beacon lights and other signals, which is declared to be unprecedented.

Dry Educational Campaign

Detroit, Mich.—A \$50,000,000 dry educational campaign was outlined at a meeting of the anti-saloon league here by its chief, Dr. Ernest H. Cherrington, who declared that education against alcoholism presents the "greatest challenge the socially-minded builders of an alcohol-free America" have faced in the last hundred years.

There are more than 19,000 doctors in the United States who practise as specialists only.

Churchill Now Experiencing Its Last Lone Winter Before Advent of New Era Next Spring

Churchill is in the chill midst of its last lone winter. Except for some 20 men—and a single woman—every resident at the Government owned Bay port has moved out to the south. The last scheduled Muskeg Limited puffed down to The Pas in early December and now the mail is "mashed in" twice a month by dog team from Gillam, at Mile 327.

Ice-locked, the 250-year-old harbor is deserted until next spring.

A skeleton force at Churchill is retained by the Hudson Bay Railway which completed the first laying of steel to the harbor 511 miles northeast of The Pas last March, and by the Department of Railways and Canals. But all railway construction and dock labor is at an end for several months. Three men remain at the government radio post, and one at the telegraph office; the Hudson's Bay Company trading post continues its work; and Rev. H. A. G bson and his wife reside at the Anglican Mission.

Otherwise the settlement at the mouth of the Churchill River, where 1,500 men toiled last summer, is abandoned to the chill winds lashing down from the sea.

In all probability, however, the Bay port of the West will never know another so lifeless stretch between autumn and spring. It is certain that the opening of the settlement to the public, planned for next spring, will mark the beginning of a record or at least partially permanent residence at Churchill. Undoubtedly, ingress to the end of the Hudson Bay Railway steel will be closely scanned by the Dominion Government; but a new town will begin to take form when the way is opened to prospective settlers.

The fact that harbor construction work is not expected to reach completion until sometime in 1931 will not prevent a hurried surge of new citizens to Churchill. As yet, under government ruling, three banking establishments alone have marked the arrival of commerce; numerous applications, however, for permission to set up establishments which might flourish on the trade of hundreds of residents busy at the harbor, have been received.

Divers considerations, no doubt, have influenced the government in the decision to supervise closely the settlement's early civic development. Housing accommodation at present is sufficient only for those busied at railway and harbor work; and, under existing conditions, water supply and sewage problems yield to but temporary solution. When Churchill assumes the status of a town, it is expected that these difficulties will have been solved.

As a harbor, nevertheless, Churchill has not been slighted by nature. Before it empties into the Bay, Churchill River swells in the shape of an oval bottle with its neck to the sea—a ready-made port. Besides, projecting headland and an island shelter the opening so that storms have little effect on the inner harbor, enclosed as it is by rocky cliffs which rise in some cases to a height of 70 feet.

Along one side of the Churchill River runs the Hudson Bay Railway, reaching almost to the tip of a narrow point projecting out into the bay. It is at the base of this point, formed of rugged rock ridged by

Lady: "Aren't you the man I gave a glass of port to the other day?"
Tramp: "Yes, and now I have come to see if you could sell me a bottle." —Eduard Half Timma, Gothenburg.

W. N. U. 1821

Horses Were Poisoned

Water From Abandoned Wells Was Responsible For Loss Of Animals In Southern Saskatchewan

That a poison of which seven drops killed a 1,400-pound horse in three days is produced by bacteria in old wells in Saskatchewan, has been discovered by Dr. J. S. Fulton, professor of animal diseases at the University of Saskatchewan. In one district 30 miles square, from 75 to 100 horses have been lost this winter. On one farm 8 out 14 horses died. Losses have been commonest in the south and west of the province. Attention was paid to the water supply where outbreaks occurred and it was found that in each case old wells had been used owing to the particularly dry season. Although the wells contained water which appeared fresh, bacteriological examination showed the presence of virulent strains of botulinum in three out of four wells.

The bacteria isolated from these waters when grown in the laboratory, reports Dr. Fulton, produced a poison of which seven drops killed a 1,400-pound horse in three days.

Small quantities of the water itself when fed to experimental animals, caused death in a few days.

Much Ado About Nothing

"For 10 years, 10 long and lean years," cried the writer, "I have been composing th's drama, changing a word here, a line there, working on it until my fingers were cramped and aching, my brain and body weary from the toil."

"Too bad, too bad," the producer murmured sympathetically. "All work and no play."

Color blindness is sometimes called Daltonism, after John Dalton, English scientist, who discovered this abnormal condition.

ROBERT L. BURNAP

Announcement has been made at Canadian National headquarters of the appointment of Robert L. Burnap, as Vice-President in Charge of Traffic, with headquarters at Montreal, vice A. T. Weldon, the appointment being effective at once.

R. L. Burnap has been associated with the various lines which now comprise the Canadian National Railway System during the whole of his railroad career of 36 years.

Champion Back At Work

The Prize Hen Of Saskatchewan University Keeps Up Record

Lady Victorine, the world's champion hen, is back at work. After completing her year's record of 358 eggs, she laid 16 more eggs before commencing to moult on September 27 last. Saskatoon thermometers are recording such temperatures as 42 below zero, but this Barred Rock lady, who lives in an unheated house at the University of Saskatchewan, started in last week and is again laying her daily egg.

Professor Baker commented on the size of the eggs this hen is producing. After one small preliminary egg as a try-out, the seven eggs produced during the past eight days have averaged five grams each over the standard egg weight.

A request was received from the committee of the Madison Square Garden Poultry Show, at New York, for the loan of the hen as a special exhibit. It was decided however, that it was undesirable to send the hen to the show as the university wish to obtain as many chicks as possible from such desirable breeding stock.

Hydro Development In West

With four large undertakings at present under construction, which will ultimately provide 445,000 h.p. hydroelectric development in the Prairie Provinces, there are indications of expansion in industrial activity for 1930 and 1931.

Buyer—Give me a radio tube and a pick-axe.

Seller—Why, we don't carry those things.

Buyer—Some drug store, I'll say.

Reproduce Hotel In Sugar

455
A large model in sugar of the great Canadian Pacific Hotel at Toronto, the Royal York, forty-two inches in height, has been made by Harry Astley, chief confectioner of the liner "Empress of Scotland." The model was exhibited at the Confectioners Exhibition, London, England, this month.

Soil Of Canada Has Played A Large Part In Giving U. S. Some Of Its Greatest Citizens

Closely Related To Marquis

In Two Years Reward Wheat Captured World's Championship

Reward wheat, a hard red spring variety with which Joseph H. B. Smith, of Wolf Creek, Alberta, won the world's wheat championship at the 1929 International Grain and Hay Show, Chicago, is closely related to the famous Marquis wheat.

It was developed from a cross between Marquis and Prelude, in 1912, at the Canadian Government Central Experimental Farm in Ottawa, with the hope of developing a variety that would combine the early ripening habit of Prelude with the greater productiveness and better straw of Marquis.

The cross resulted in several exceedingly interesting and promising combinations, one of which received the name of Reward. This new variety, as it now exists, matures in less than one hundred days from the time of planting, or about fourteen days earlier than Marquis takes to mature. Reward produces an excellent quality of flour and a very fine appearing kernel. The straw is of medium length and excellent strength.

It was first released to farmers in western Canada and elsewhere in commercial quantities in 1928, and within two years had captured the world's championship.

United States Government Loans Motion Picture Films To Canada

Through the courtesy of the United States Government Bureau of Mines, the Canadian Department of Mines, Ottawa, has received the following motion picture films for free circulation throughout Canada:

"The Story of Sulphur" (2 reels).
"The Story of Rock Drilling" (2 reels).

"The Story of Steel" (6 reels).
"The Story of Gasoline" (3 reels).
"Heat Treatment of Steel" (2 reels).
"Through Oil Lands of Europe and Africa" (2 reels).

"The Story of Dynamite" (2 reels).
"Carbon Monoxide: the Unseen Danger" (1 reel).

These films are all on standard (35 mm.) stock, and are all non-inflammable except "The Story of Rock Drilling."

No charge is made for the rental of the films, but the borrower is expected to pay express charges. Application for the loan of any of these films should be addressed to The Director, Geological Survey, Department of Mines, Ottawa, Canada.

"The plot thickens," said the old lady as she sowed the grass seed for the third time.

Northward into the Canadian West there is a steadily increasing migration of men and women from the United States. Continued long enough this may make up for the loss of population during the past century of Canadian citizens to the great republic.

It may not be so stated in United States school books, but the soil of Canada has played a part directly or indirectly in furnishing the United States with some of its greatest citizens.

In a little churchyard in Norwich, Oxford County, Ontario, rest some of the maternal ancestors of President Herbert Hoover. In the early days they fled from the rocky fields of Pennsylvania to take up land in Canada. Near Norwich, on soil that was not the best, they struggled on for many a year. Then the news of free land in Iowa caused Hoover's grandparents to yoke up the oxen and head west. Toil and poverty were the lot of these fine Quaker people. Is it any wonder that President Hoover now receives with sympathy the pleadings for assistance of the farmers of the United States?

President Hoover's people left Oxford County for Iowa about the time that Thomas A. Edison got a job as telegraph operator 20 or 30 miles north of Norwich at Stratford, in the County of Perth. It is 50 years since Edison invented the incandescent lamp and it is said that he neglected his routine work in the railway station at Stratford to carry on his experiments in electricity.

In the seventies a boy ran away from Victoria, British Columbia, with a circus. His father, a Jew, who had met disaster in the Cariboo goldfields, mourned for David Belasco for many a day. Then David, who was supposed to be dead, turned up very much alive. He lived to become probably the greatest producer in the history of the American stage.

These are but three examples of famous citizens of the United States who have often referred to the influence upon their lives or the lives of their parents of the free and invigorating air of the Dominion of Canada. A complete list would include probably scores of names, among them such notable figures as the late James J. Hill, builder of the Great Northern Railway, native of Guelph, Ontario; the late Franklin K. Lane, minister in Woodrow Wilson's cabinet, from the Maritimes, and Captain Robert Dollar, shipping magnate, of Scottish origin, but for many years a logger in the Ottawa Valley.—Vancouver Province.

Encouraging Sheep Industries

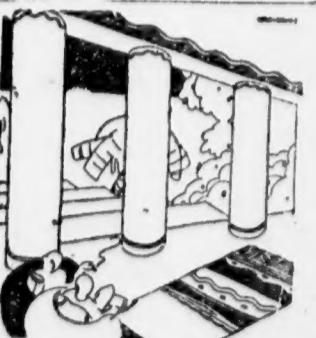

Manitoba Department Of Agriculture Distributing Breeding Stock To Beginners

Reports from the livestock branch, Manitoba Department of Agriculture, show approximately 140 head of rams distributed to breeders, mostly beginners, who received ewes from the Manitoba Livestock Credit Company, from recent importations. Of this number about 70 are Shropshires, 52 Oxfords, 12 Suffolks, and six Hampshires.

Irate Editor (to cub who seeks advice at inconvenient moments): "What are you doing now?"

Cub: "Just odd jobs, sir."

Irate Editor: "Splendid. Make a bolt for the door, will you?"

"I will meet you Wednesday, of next week."

"I have to go to America next Wednesday."

"Then shall we say Thursday?" — Gutierrez, Madrid.

Lady: "Aren't you the man I gave a glass of port to the other day?"
Tramp: "Yes, and now I have come to see if you could sell me a bottle." —Eduard Half Timma, Gothenburg.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, marries Molly Winton, a ballad singer, not knowing he is loved by Grace Farrel, a loyal little cigarette girl. After Al wins fame as a composer of popular songs, Molly elopes with John Perry, taking her baby, Junior, as she sails for France. Al, broken by the loss of his son, becomes a derelict, but is saved by Grace Farrel, and recovers to appear in a Broadway revue. One night he receives a phone call from Molly and rushes to a hospital to find Junior fatally ill. He sings to Junior, but his son dies. Then Al dashes back to the theatre to find he must sing the same song to his audience.

CHAPTER XXXI.

The bright lights were on, the stage was empty, the orchestra played the opening bars that heralded Al's entrance. But still he stood in the wings as if in a trance, fearful of attempting the song he had just sung to his dying child. The orchestra stopped, started again, and the stage manager ran toward Al.

"That's your number, big boy."

"I can't sing that song," protested Al. "Not tonight."

The stage manager saw something was wrong, but he didn't know what. "It's too late to change, now, Al. It's your hit song. Think of the show!"

The show! Al walked on the stage, driven by sheer force of will. There were the lights, there was the orchestra leader, beyond were the dim sea of faces of the audience. Without

Weak After Operation

"After having an operation, I was very miserable, weak, nervous and very near unfit to work. I saw Lydia E. Pinkham's Vegetable Compound advertised and tried it and believe it helped me wonderfully. I have no weak spells any more, the pains have left me and my nerves are much better. I feel safe in saying Lydia E. Pinkham's medicines have helped me wonderfully." —Mrs. Wm. H. Beechsteller, Box 143, Port Colborne, Ontario.

Lydia E. Pinkham's Vegetable Compound

knowing it, he fell into his character, the happy-go-lucky singing fool. A roar of applause came up and met him like a great wind. He went into his song, believing he could carry on.

The stage manager relaxed and turned to Grace. "What's the matter with him?"

Quickly Grace explained and they both watched Al with anxious eyes. Would he make it? He was singing bravely, but it was apparent to their well trained ears that he was faltering now and then. When he came to the chorus the quaver in his voice was too intense. Once his voice broke entirely.

Suddenly it seemed to Al as if that sophisticated audience didn't exist. Instead of grown-up faces he saw hundreds of faces of babies and children, pleading and beckoning to him. Babies and children, who had drifted off into Never-Never Land, and among them Junior! Junior's face and figure came toward him with arms outstretched.

Only Grace understood the dreadful ordeal he was passing through. She felt as if he were sinking into that sea of light while she stood by, unable to aid him.

To the audience it seemed as if the intense fervor of Al's singing, keyed close to the breaking point, was only a phase of his skilful rendering, but the musicians caught the occasional minor breaks and glanced up with worried expressions.

Then the end came—Al simply broke off singing in the midst of his song. He stood there, seeing Junior as plainly as he had seen him at the hospital. . . . Where was he? Oh, yes, the theatre, the lights. He tried to rally, choked, and stopped again. Swiftly the stage manager signalled to have the curtain lowered.

As the curtain came down Grace ran forward and caught Al in her arms. The stage manager was by her side to put an arm about his star singer and help him toward his dressing room. From beyond the curtain came the staccato beat of the applause. The audience was bewildered, but it realized that the best tribute it could give was due the man who had just stood before it.

Al collapsed in his dressing room chair, his head dropping limply forward on his chest. What had happened? . . . Oh yes, he remembered—he had tried to sing and failed. He raised his head, gazed around the room curiously and brought his eyes back to Grace's face. Here was dear, loyal Gracie standing before him—loyal Gracie standing before him—that was a help, at any rate.

"I guess I flopped, darling."

Grace did not answer. She simply took his face in her hands, holding it firmly and gently, as if to soothe the trembling muscles. How curiously large and brilliant his dark brown eyes seemed with the solid black make-up around them.

As Grace tried to quiet him Al saw Junior's photograph and heard the ticking of his watch, which seemed strangely loud. It was like a voice telling him that time was passing and that his baby had gone away.

He picked up the watch and began slowly turning the hands backward—to nine o'clock, to eight, seven and six. Then he stopped, while an uncanny expression, almost like a smile, crossed his face. Grace drew back with a terrible rising fear that he might be losing his mind.

"What is it, darling? Why are you doing that?"

"I'm doing it because of Junior."

His voice and eyes were rational now and she saw a tear splash across the watch case.

"I'm turning my watch back," he said softly, "to the time when he was still alive!"

No one but Al and Grace knew the fierce struggle that little Grace passed through after Junior's death to save the man she loved.

It seemed as if the menace of his first breakdown lurked, like an ogre, just around the corner, waiting to pounce out and send him down and out. Its chance came with the passing of the little boy Al had loved with his whole heart. So the ogre of despair was at Al again, while Grace fought valiantly.

She watched Al like a hawk, fearful that he would disappear once more. She knew if he did she would never be able to bring him back. The second breakdown would be much worse than the first.

On the day after his breakdown Al's old sense of apathy took possession of him; he told Grace he would have to quit the show. But at this declaration Grace took

With the 200-inch telescope now under construction, astronomers expect to peer into spaces of the universe three times as far as those heretofore penetrated.

Tribute For Newspaper Editor

One Of Greatest Newspaper Editors Of Great Britain To Be Honored By City Of Manchester

C. P. Scott, chief proprietor of the Manchester Guardian, and until his resignation a few months ago one of the greatest newspaper editors in Great Britain, will be honoured by the city of Manchester when the freedom of the city is conferred upon him shortly.

"C. P." resigned the editorship of the Guardian, which he had developed into one of the most influential organs in the country, in July of last year. The task devolved upon his son, Edward Taylor Scott.

On that occasion "C.P." received from His Majesty a telegram congratulating him upon his editorship of the Guardian for 57 years, an achievement which His Majesty remarked "was surely unique in the history of journalism."

CONSTIPATED CHILDREN

Constipation is one of the most common ailments of childhood and the child suffering from it positively cannot thrive. To keep the little one well the bowels must be kept regular and the stomach sweet. To do this nothing can equal Baby's Own Tablets. They are a mild but thorough laxative; are pleasant to take and can be given to the newborn babe with perfect safety. Thousands of mothers use no other medicine for their little ones but Baby's Own Tablets.

They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Alberta's Gas Tax

Despite rebates of \$250,000 within six months to users of gasoline for industrial purposes, Alberta's gas tax has produced a net revenue of \$1,750,000 between April 1st and November 1st, provincial officials state. At least \$50,000 more is expected to be taken by March 31st, 1930, the end of the fiscal year.

Corns cause much suffering, but Holloway's Corn Remover offers a speedy, sure, and satisfactory relief.

Speaking For Himself

"Call these prize cattle? Why, they ain't nothing to what our folks raise. My father raised the biggest calf of any man around our parts."

"Don't doubt it," remarked a bystander, "and the noisiest."

India has a population of 320,000,000, practicing nine great religions, speaking 130 different dialects, belonging to six distinct families of speech.

Persian Balm—the peerless aid to loveliness. Delightfully fragrant. Dainty to use. Leaves no stickiness. A little gentle rubbing and it is swiftly absorbed by the tissues. Tonic in effect. Soothes and dispels roughness and chafing. Keeps skins soft and velvet-textured. Unrivalled for charm, distinction and refinement. Used by lovely women everywhere to preserve and enhance their natural beauty.

"Dear Lord," prayed the co-ed, "I don't ask anything for myself — just give mother a son-in-law."

Needless Pain!

The man who wouldn't drive his motorcar half a mile when it's out of order, will often drive his brain all day with a head that's throbbing.

Such punishment isn't very good for one's nerves! It's unwise, and it's unnecessary. For a tablet or two of Aspirin will relieve a headache every time. So, remember this accepted antidote for pain, and spare yourself a lot of needless suffering. Read the proven directions and you'll discover many valuable uses for these tablets. For headaches; to check colds. To ease a sore throat and reduce the infection. For relieving neuralgic, neuritic, rheumatic pain.

People used to wonder if Aspirin might be harmful. The doctors answered that question years ago.

TOO MANY GIRLS—

dread winter weather for the torture it brings from sore faces, chapped hands, frostbite and cold sores.

With the face, hands and arms protected by Zam-Buk, frost and cold winds simply cannot redden, roughen and chafe your skin. Wash with Zam-Buk Medicinal Soap and apply the Zam-Buk balm after drying.

There is nothing like this Zam-Buk treatment for keeping the skin smooth, strong and flexible. Composed exclusively of rich herbal essences, Zam-Buk soothes and purifies the tissues and prevents all roughness and soreness.

Where the skin has already become chapped, blistered and sore, Zam-Buk, because of its great antiseptic and healing power is doubly valuable. It takes away the smarting irritation almost immediately, kills dangerous disease germs and quickly heals with new healthy skin.

Zam-Buk is the best remedy obtainable for chapped, cracked hands, cold-sores, frostbite, chilblains, winter eczema, burns, scalds, and all wounds and injuries. 50c. box, all chemists.

Little Helps For This Week

"The love of Christ constraineth us." —2 Corinthians v. 14.

Blest be Thy love, dear Lord,
That taught us this sweet way:
Only to love Thee for Thyself,
And for that love obey.

—John Austen.

"The love of Christ constraineth me." It is in the light of these words that we come to understand the meaning of the cross of Christ. If love is to be the king of your life and mine, if with us here, amid all the strife and rivalry that make up our "workaday world," the voice that bids us love is to be regnant over all other voices, somewhere or other there must be the spell that compels us to do so. An apostle has found the spell when he wrote, "the love of Christ constraineth me;" and other men than he, aye, a multitude whom no man can number, have looked also into the face crowned with thorns, and have learned there how to love.—Henry C. Potter.

Persian Balm—the peerless aid to loveliness. Delightfully fragrant. Dainty to use. Leaves no stickiness. A little gentle rubbing and it is swiftly absorbed by the tissues. Tonic in effect. Soothes and dispels roughness and chafing. Keeps skins soft and velvet-textured. Unrivalled for charm, distinction and refinement. Used by lovely women everywhere to preserve and enhance their natural beauty.

"Dear Lord," prayed the co-ed, "I don't ask anything for myself — just give mother a son-in-law."

DON'T MISS IT

IMOGENE AND ANDREW

"The farm problem is certainly worrying the politicians!" exclaimed Andrew, looking up from his paper.

"I don't understand why every one is always worrying about the farmers," answered Imogene. "With the price of everything in the market as high as it is, I don't see why the farmers don't get rich. I never could understand why every one worries about the farmers, trying to do something for him. Seems to me the farmer has an easy life."

"Look at the price of eggs! What does a farmer do to get eggs? He has a flock of hens that walk around the yard and eat fish worms and stale bread and cake and things like that. Then the hens sit down and lay eggs and the farmer sells them. The hens do all the work and the farmer gets all the money."

"Same way with his frying chickens. If the chicken is a rooster, all he has to do is to let the mother hen hatch it out and raise it for him. When it is big enough he takes it to the market and sells it. He hasn't done a thing but sit on the verandah and watch it grow."

"For milk he just has a flock of cows which stand around in the meadow and eat grass. All he has to do is to send his wife or daughter to milk the cow and take the milk to the creamery or to town and sell it. The cow does all the work."

"If he doesn't want to make so many trips to town, he lets the milk set till it turns to butter, or does whatever they have to do to make butter, and he sells that. The cow works for the farmer like the chickens do."

"Pigs work for him, too, and he never has to do a thing but provide a muddy place for them to root and sleep. When they get fat he turns them into bacon and ham and sells them. The pigs do the work and the farmer gets the money."

"For corn and beans and things he scatters a few seeds on the ground and then sits down and waits till the earth does the work of growing up to the time when the corn and the beans are big enough to sell. He gets all the money."

"Spinach, rhubarb, radishes, celery, cabbage and everything are alike, Andrew. He throws seed in the ground and only has to wait till they come up, grow and get ripe, and then he takes them to town and gets all the money for himself."

Farmers always have a lot of children. They don't have to do anything about those either, for their wives raise them and then they send them out to pick the peas, the corn and hoe the potatoes. The farmers get all the money for what their children hoe and pick."

"I don't pretend to know anything about politics, Andrew, but I think with the hens and the cows and the pigs and the children and the ground and wives and everything helping the farmer, he has so much help already the government hasn't any business helping him."

"When the city people go to the country and eat what the farmer has raised, so he doesn't have to carry it to town, they are doing quite enough."

"That Mr. Miller up the road where we get our eggs and milk doesn't need help. Every time I go there he is standing by the fence looking at his pigs and hens or something as though he thought they weren't doing enough for him. And he charges me the same price for eggs he would get in town!"

"You ought to tell Mr. Miller what you have told me!" laughed Andrew.
